

## Treatments/services and Pricing (March 2025)

These serve as a guide and prices will be individualised accordingly at the consultation.

Consultation fees of R800 apply to all first- time patients with doctor in addition to the treatment undertaken. This is for the benefit of gathering information, answering questions, and formalising a treatment plan with you.

The consultation fees are non-refundable and are irrespective if you have consulted the therapist first.

## EXOSOMES

### Exosomes Treatment **per session R4500**

Best results 2 sessions 4 weeks apart

Exosomes treatment are extracellular vesicles that are derived from stem cells and are pivotal in cell communication. This solution is microneedled into the skin. When applied to the skin, exosomes deliver targeted messages to skin cells, encouraging them to rejuvenate and repair, thus enhancing the effects of the microneedling treatment.

#### Benefits of Exosomes Treatment in Skincare:

**Cellular Repair:** Promotes the repair and regeneration of skin cells.

**Boosts Efficacy:** Enhances the natural effects of microneedling, leading to improved outcomes.

**Reduces Inflammation:** Helps in reducing skin inflammation and promotes healing.
